Data Analyst | Automation Engineer

Cairo, Egypt | +20 101 427 7880 | Abdelrahmannelmogyy22@gmail.com | LinkedIn: Abdelrahman Elmoggy
Portfolio: abdelrahmannelmogyy.github.io

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of experience transforming complex datasets into clear, actionable insights. Proficient in **Power BI, SQL Server, Python, and Excel**, with a strong track record of designing dynamic dashboards, automating reporting pipelines, and optimizing data workflows. Experienced in end-to-end KPI monitoring, customer behavior analysis, and campaign performance evaluation. Combines engineering precision with strategic thinking to deliver measurable, data-driven results.

CORE COMPETENCIES

✓ Data Analysis & Reporting	✓ Python Scripting & Automation	✓ Web Scraping & ETL
✓ Power BI Dashboard Design	✓ Excel (Advanced)	✓ Campaign Analytics (IVR, WhatsApp)
✓ SQL Server & Data Modeling	✓ KPI Tracking & Monitoring	✓ Process Optimization

PROFESSIONAL EXPERIENCE

Data Analyst & Automation Engineer
Maharah International for Debt Collection — Cairo, Egypt

July 2024 – Present

Data Analysis & Reporting

- Designed and delivered dynamic Power BI and Excel dashboards for real-time KPI monitoring, enabling data-driven decision-making across departments.
- Analyzed debt recovery trends and customer behavior patterns, providing insights that directly boosted collection recovery rates.
- Automated reporting pipelines using Python and SQL Server, reducing manual effort by 60% and significantly improving accuracy.

Campaign Analytics & Management

- Led end-to-end performance analysis of IVR, WhatsApp, and email campaigns using Power BI, SQL Server, and Python — delivering data-driven optimization strategies.
- Built automated web scraping bots and workflow automation scripts that streamlined repetitive data extraction and reporting tasks.
- Developed internal tools (Claim Finder Pro, Payment Checking Robot, Campaign AutoFlow) built with Python Flask, all connected to company databases for live data access.

Technical Leadership

- Provided technical leadership for the electronic collection team, guiding automation initiatives and system improvements to raise operational efficiency.
- Migrated critical systems from cloud-hosted environments to on-premise Windows Server infrastructure, reducing latency and cutting hosting costs.

Aug 2023 – June 2024

- ## Freelance Python Developer Remote

- Automated client processes using Python, reducing manual workloads by up to 40% across various industries.
- Designed and implemented web scraping bots for efficient data extraction and reporting.
- Delivered tailored data analysis solutions, enhancing decision-making efficiency for clients.

- Maharah Debt Trend — tracked and forecasted collection performance
- Digital Fingerprint Fraud Analysis
- Medical Appointments Optimization
- The Expansion of Startups

Soft Skills: Problem-Solving, Team Leadership, Technical Guidance, Time Management, Attention to Detail

CERTIFICATIONS

<i>Feb – Apr 2023</i>	Udacity — Data Analysis Professional
<i>Mar – Apr 2022</i>	Udacity — Data Analysis Challenger
<i>Nov – Dec 2023</i>	Planet of Skills — Excel + Power BI Diploma
<i>Sep – Nov 2022</i>	HackerRank — Advanced & Intermediate (Python, SQL)
<i>Aug – Sep 2022</i>	NTI — Cyber Ops Associate
<i>Jul – Sep 2021</i>	ITI — CCNA

EDUCATION

Bachelor of Communication Engineering

Mansoura University, Egypt

2018 – 2023
